680mm wide x 2220 mm high
(example shown @ 10% of full size)

All panels in our pop up curved wall systems are 680mm wide x 2220 mm high

Set up instructions

1 Open the hard case.

2 Check components: pop up frame, magnetic bars, graphic print wall (5 pcs) and hard case sign, two lights, two leads.

3 Take out frame from soft carry bag.

4 Connect spotlights to top of frame by sliding light across bracket. Turn light switch to on position.

5 Put foot softly on bottom of frame. Expand the frame slowly with lights on.

6 Extend frame fully and ensure four magnetic connectors are attached.

7 Orient the pop-up with curved end facing the front.

8 Align the magnetic bars vertically to front (12) and immediate left and right rear sides (6). Press into place and ensure they are attached securely.

9 Start with middle panel and raise up over tabs on frame and slide down SLOWLY to lock into place. (DO NOT PULL DOWN HARD). Align panel left and right side to centre of magnetic bar.

10 Proceed to fit remaining two panels to front of pop up in the same manner as the first.

11 End panel installation (Suggest two people do this task). Hang panel onto back hook first. Align to magnetic strip. One person holds back in place while the other bends panel around to front and attaches clip on panel to top hook. Align and secure panel to magnetic bar all the way down.

12 Check pop-up panels for alignment and adjust if required. Plug in lights and connect to power supply to test. Put away all bags into counter case and close. Wrap counter sign around case with velcroed section to the rear and connect.
